

USING THIS MEASURING GUIDE

- ◆ Begin by printing this sheet at 100%. To confirm, use a standard ruler and make sure the sizing chart on the left is exactly 2 inches.
- ◆ Next, trim out the ring sizing band or measure an existing ring against the best sized matching circle below.
- ◆ Please take into account finger swelling. It is best to measure at the end of the day when fingers are at their fullest.
- ◆ Avoid measuring when your hands are moist or cold.
- ◆ Remember that the larger the ring band is, the more tightly a ring will fit. Narrow bands will have a looser fit.

MEASURING AN EXISTING RING

- ◆ Using a ring that already fits the finger selected for the new purchase, place the ring on it's side and lay it over the circle below that best matches the inside diameter.
- ◆ If the ring size falls between two of the sizes please order the quarter size (example: between size 7 and 7.5 = 7.25).

Alternate Measuring Option: Use the AZEERA Ring Sizer

- ◆ Cut out the ring sizing band below.
- ◆ Wrap the band around the widest part of the desired finger for new ring and insert through the dotted line (cut through dotted line prior to use).
- ◆ Write down your ring size. Remove. Measure again and place your order!
